1. Scope, purpose and users

This Procedure provides general principles and approach model to respond to, and mitigate breaches of personal data (a “personal data breach”) in one or both of the following circumstances:

- The personal data identifies data subjects who are residents of the Member States of the European Union (EU) and countries in the European Economic Area (EEA), regardless of where that data is subject to processing globally; and
- The personal data is subject to processing in the EU and/or EEA, regardless of the country of residency of the data subject.

This Procedure is applicable also for any other type of security incident.

The Procedure lays out the general principles and actions for successfully managing the response to a data breach as well as fulfilling the obligations surrounding the notification to Supervisory Authorities and individuals as required by the EU GDPR.

All Employees/Staff, contractors or temporary Employees/Staff and third parties working for or acting on behalf of KubeNet (“Company”) must be aware of, and follow this Procedure in the event of a personal data breach, or other security weakness or an incident.

2. Reference documents

- EU GDPR 2016/679 (Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC)
- Information Security Policy
- Personal Data Protection Policy

3. Definitions

The following definitions of terms used in this document are drawn from Article 4 of the European Union’s General Data Protection Regulation (GDPR):

“Personal Data” means any information relating to an identified or identifiable natural person (‘data subject’); an identifiable natural person is one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person Regulation.

“Controller” is the natural or legal person, public authority, agency or any other body, which alone or jointly with others, determines the purposes and means of the processing of personal data.

“Processor” is a natural or legal person, public authority, agency or any other body which processes personal data on behalf of a Data Controller.

“Processing” means any operation or set of operations which is performed on personal data or on sets of personal data, whether by automated means, such as collection, recording, organisation, structuring, storage, adaptation or alteration, retrieval, consultation, use, disclosure by transmission, dissemination or otherwise making available, alignment or combination, restriction, erasure or destruction.

“Personal Data Breach” means a breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data transmitted, stored or otherwise processed.

“Supervisory Authority” means an independent public authority which is established by a Member State pursuant to Article 51.

4. Data Breach Response Team

A Data Breach Response Team must be a multi-disciplinary team comprised of knowledgeable and skilled individuals in IT Department, IT Security, Operations & Compliance. The team is a physical (local) team which responds to any suspected/alleged data breach, security weakness or a security incident (further in text collectively referred to as: “data breach”).

Company Directors appoints the members of the Data Breach Response Team. The Team must be appointed regardless of whether or not a breach has occurred.

The team must ensure that necessary readiness for a data breach response exists, along with the needed resources and preparation (such as call lists, substitution of key roles, desktop exercises, plus required review of company policies, procedures and practices).

The team’s mission is to provide an immediate, effective, and skilful response to any suspected/alleged or actual data breaches affecting the Company.

If required, the team members may also involve external parties (e.g. an information security vendor for carrying out digital forensics tasks or an external communications agency for assisting the Company in crisis communications needs).

The Data Protection Officer can choose to add additional personnel to the team for the purposes of dealing with a specific data breach.

In the event that the Data Protection Officer is unavailable, the Security Officer will take precedence.

The Data Breach Response Team may deal with more than one suspected/alleged or actual data breach at a time. Although the core team may be the same for each suspected/alleged or actual data breach, there is no requirement for this.

The Data Breach Response Team must be prepared to respond to a suspected/alleged or actual data breach 24/7, year-round. Therefore, the contact details for each member of the Data Breach Response Team, shall be stored in a central location, and shall be used to assemble the team whenever notification of a suspected/alleged or actual data breach is received.

5. Data Breach Response Team duties

Once a data breach is reported to the Data Protection Officer / Security Officer, the team must implement the following:

- Validate/triage the data breach
- Ensure proper and impartial investigation (including digital forensics if necessary) is initiated, conducted, documented, and concluded
- Identify remediation requirements and track resolution
- Report findings to the top management
- Coordinate with appropriate authorities as needed
- Coordinate internal and external communications
- Ensure that impacted data subjects are properly notified, if necessary
- Analyse each incident recorded in the Data Breach Register and, if necessary, suggest preventive or corrective action

The Data Breach Response Team will convene for each reported (and alleged) data breach, and will be headed by the Data Protection Officer.

6. Data Breach Response process

The Data Breach Response Process is initiated when anyone who notices that a suspected/alleged or actual data breach occurs, and any member of the Data Breach Response team is notified. The team is responsible to determine if the breach should be considered a breach affecting personal data.

The Data Protection Officer is responsible for documenting all decisions of the core team. Since these documents might be reviewed by the supervisory authorities, they need to be written very precisely and thoroughly to ensure traceability and accountability.

7. Personal data breach notification: Data processor to data controller

When the personal data breach or suspected data breach affects personal data that is being processed on behalf of a third party, the Data Protection Officer of the Company acting as a data processor must report any personal data breach to the respective data controller/controllers without undue delay.

The Data Protection Officer will send Notification to the controller that will include the following:

- A description of the nature of the breach
- Categories of personal data affected
- Approximate number of data subjects affected
- Name and contact details of the Data Breach Response Team Leader/ Data Protection Officer
- Consequences of the personal data breach
- Measures taken to address the personal data breach
- Any information relating to the data breach

Data Protection Officer will record the data breach into the Data Breach Register.

8. Personal data breach notification: Data controller to supervisory authority

When the personal data breach or suspected data breach affects personal data that is being processed by the Company as a data controller, the following actions are performed by the Data Protection Officer:

- 1) The Company must establish whether the personal data breach should be reported to the Supervisory Authority.
- 2) In order to establish the risk to the rights and freedoms of the data subject affected, the Data Protection Officer must perform the Data Protection Impact Assessment on the processing activity affected by the data breach.
- 3) If the personal data breach is not likely to result in a risk to the rights and freedoms of the affected data subjects, no notification is required. However, the data breach should be recorded into the Data Breach Register.
- 4) The Supervisory Authority must be notified with undue delay but no later than in 72 hours, if the personal data breach is likely to result in a risk to the rights and freedoms of the data subjects affected by the personal data breach. Any possible reasons for delay beyond 72 hours must be communicated to the Supervisory Authority.

Data Protection Officer will send Notifications to the Supervisory Authority with the use of template FORM-014 (KubeNet – Data Breach Notification Form to S.A) that will include the following:

- A description of the nature of the breach
- Categories of personal data affected
- Approximate number of data subjects affected
- Name and contact details of the Data Breach Response Team Leader/ Data Protection Officer
- Consequences of the personal data breach
- Measures taken to address the personal data breach
- Any information relating to the data breach

9. Personal data breach notification: Data controller to data subject

Company Directors must assess if the personal data breach is likely to result in high risk to the rights and freedoms of the data subject.

If yes, the Data Protection Officer the Company must notify with undue delay the affected data subjects.

The Notification to the data subjects will be provided in the approved notification template KN-FORM-015 (KubeNet – Customer Breach Notification Form)

If, due to the number of affected data subjects, it is disproportionately difficult to notify each affected data subject, the Company Directors must take the necessary measures to ensure that the affected data subjects are notified by using appropriate, publicly available channels.

10. Accountability

Any individual who breaches this Procedure may be subject to internal disciplinary action (up to and including termination of their employment); and may also face civil or criminal liability if their action violates the law.

11. Managing records kept on the basis of this document

Record name	Storage location	Person responsible for storage	Retention time
Contact details	Salesforce under Account “KubeNet Data Breach Team”	Data Protection Officer	Permanently
Documented decisions of the Data Breach Response Team	Remedyforce under Breach Incident Reference	Data Protection Officer	5 years
Data breach notifications	Remedyforce under Breach Incident Reference	Data Protection Officer	5 years
Data Breach Register	Remedyforce	Data Protection Officer	Permanently
